Professional Summary

Graduate Data Engineer with hands on experience designing scalable batch and streaming data platforms using Python, Apache Kafka, Apache Spark, Apache Airflow, PostgreSQL and Docker. Built end to end ETL pipelines, real time analytics platforms and anomaly detection systems through production style projects. Pursuing an MSc in Data Science at Coventry University, with a strong focus on Data Engineering, distributed systems and modern data platforms, and seeking Graduate Data Engineer opportunities in the UK.

Technical Skills

Programming: Python, SQL, Bash

Data Engineering: Apache Kafka, Apache Spark, Apache Airflow, ETL Pipelines, Streaming Pipelines, Data Modeling, Data Warehousing

Databases: PostgreSQL

Tools: Docker, Git, Linux

Cloud: AWS (Learning)

Libraries: PySpark, Pandas, NumPy

Projects

Real Time E-commerce Analytics Platform

- Designed a real time data platform using Apache Kafka, Spark Structured Streaming, PostgreSQL and Docker.
- Implemented Bronze→Silver→Gold style streaming data processing.
- Built scalable ingestion and transformation pipelines for analytics.

Airflow Incremental ETL Pipeline

- Developed production style ETL workflows using Apache Airflow and PostgreSQL.
- Implemented incremental loading and automated orchestration with Docker.

Real Time E-commerce Anomaly Detection

- Built a streaming anomaly detection pipeline using Spark ML.
- Applied feature engineering for real time transaction monitoring.

Kafka Streaming Data Pipeline

- Designed a Producer → Kafka → Consumer → PostgreSQL architecture.
- Demonstrated reliable asynchronous event ingestion using Python and Kafka.

Education

Coventry University, United Kingdom

Expected Sep 2026

MSc Data Science

Maharishi Markandeshwar University, India

2020–2024

Bachelor of Technology (Computer Science)

CGPA: 8.58/10

Certifications

DataCamp Data Science Associate (Verified)

Certificate DataCamp Profile

Languages

English Hindi Punjabi
